

A Recipe for More Environmentally Sustainable Non-Formal Education

Environmental sustainability?

why?

quality of life improvement

ecosystem protection

investment in the future

preserving natural resources

Being environmentally friendly in non-formal education means...

Being aware of the impact on the environment that different activities have

Reducing the negative impact we have on the environment

Applying the sustainability priorities while designing and achieving goals set for the project

Striving for more environmentally responsible behaviour led by example, and practice the values in everyday life

Saving resources, reduce energy use, waste, and carbon footprint

Opting for sustainable food and mobility choices

Encouraging engagement and proactivity for sustainable development in communities

Benefits of your more environmentally friendly activities

an action now for a better future

greener impact of the project

enhancing environmental awareness of participants

setting standards for sustainability in non-formal education

enabling your target groups to experience green solutions

reduction of carbon footprint

saving resources

TIPS AND TRICKS FOR ENVIRONMENTAL SUSTAINABILITY

Transport

Encourage resigning from flying

If travelling by plane, reduce the number of connecting flights to cut down the emissions

Give incentives to travel green, e.g. reimburse accommodation costs on the way

Encourage using reusable water bottles during travel

If you spare some money on traveling green, donate the saving to a green cause or charity

Food

Go vegetarian or vegan

Provide locally sourced, seasonal, organic food

Plan the amount of food and mealtimes to avoid food waste

Give flexibility to participants to cancel a meal if they know that they will not eat it

Go for self-service with instructions not to take more than you can eat

Use reusable dishes

When possible, repurpose leftover food for future meals and compost the remaining

Arrange to donate the excess food to those in need

Avoid packaged food/sweets with palm tree oil

Venue

Choose accommodation that uses green practices

Host the event in a place using renewable energy sources

Provide shared rooms for the participants

Use a training room with access to natural light

Save energy - unplug unused devices, switch off the lights, use energy-saving bulbs

Place recycling and compost bins in the training room and explain the recycling rules to the group

Encourage shorter showers

Avoid air-conditioning

Resources

Ask participants in advance to bring their own notebook, pen, folder, and refillable bottle

Use sustainable materials wherever possible, e.g. recycled paper, avoid plastic use

Provide the materials in electronic version instead of print-outs and use or recycle materials, e.g. posters

Educate

Share with the group why you apply green practices

Find experts within the group who can share more in-depth information on the topic

Create an info poster that participants can share further in their communities and organisations

Learning Lab(oratory)

QUALITY NON-FORMAL EDUCATION IN THE DIGITAL WORLD

The infographic has been produced in the frame of the "Learning Lab(oratory) - quality non-formal education in the digital world" project by Service Civil International Poland.
